

Marker Plates

Features and Benefits

The plates and tags are suitable for rapid marking. They can be used regardless of the circumference of the bundle, since they can be fixed using cable ties of any length (width up to 7.4 mm).

The tags can either be written manually using T82 marker pens or fitted with the appropriate labels. They can also be direct printed using the hot stamping process. Just ask us.

Application

Used with Ovalgrip markers for identifying larger pipes and cables.

A clearly better way of identifying cables and pipes.

Marker pens T82S-BK and T82R-RD.
